Technical Skills

Frontend: JavaScript, Typescript, React, Redux, Vue.js, Bootstrap, HTML5, CSS, TailwindCSS
Backend: Python, Node.js, Express, REST, Django, MongoDB, PostgreSQL
Development: Git, GitHub, Jira, Figma, Visual Studio Code, PyCharm, Postman, Heroku

Projects

Kicksential   *React | Django | PostgreSQL | TailwindCSS*
E-commerce web application for discovering and purchasing the latest trending shoes.
- Developed responsive and interactive frontend design using **React** and **TailwindCSS**.
- Created robust backend **API** functionalities using **Django Rest Framework**.
- Implemented user authentication using **Djoser** and **JWT authentication** for secure user accounts.
- Leveraged **PostgreSQL** for efficient **data storage** and retrieval.

GitHub Link   Live Link

Music AI Assistant   *Next.js | Typescript | TailwindCSS*
Your personal music discovery companion utilizing OpenAI to help find music that perfectly matches your preferences.
- Implemented **real-time streaming conversations** between users and the chatbot through **Vercel AI SDK library**.
- Trained **OpenAI chatbot** as a music librarian assistant, by specifying this role in the get response from the API endpoint.
- Designed the message box interface, emulating a familiar look of iPhone's iMessage using **TailwindCSS**.

Climate Change   *React.js | Node.js | MongoDB*
Travel companion for exploring the weather in different cities to help you create sensible packing lists for your trips.
- Designed and implemented a **RESTful API** around the clothing resource.
- **MongoDB** database to manage and store user clothing lists.
- Implemented features for users to search for the weather in different cities using a public **weather API**.
- Utilized **axios** to make **API calls** to fetch weather data from API, based on user's selected city.
